EDUCATION

- 2019 - 2022**
(NIIT) National Institute of Information Technology
 - Diploma in Software Engineering

TECHNICAL SKILLS

Languages & Frameworks: Python, Django, JavaScript

Database & Tools: SQL, MongoDB, Pandas, NumPy, Excel

Web Scraping & Automation: Selenium, BeautifulSoup, Scrapy, Requests, Playwright, Puppeteer, Crawler

Data & Pipelines: ETL Pipelines, Data Extraction, Data Cleaning, n8n, Workflow Automation

Others: REST APIs, Git, Docker, OCR, Linux, AI/ML Integration, Tkinter, Cybersecurity

CERTIFICATIONS

- Python (HackerRank)
- Advanced SQL (HackerRank)
- Software Engineer (HackerRank)

LANGUAGES

- English
- Hindi

SUMMARY

Software Developer with 4+ years of experience in building automation tools, web applications, and data pipelines using Python, Django, SQL, and web scraping technologies. Skilled in developing RESTful APIs, automating workflows, large-scale web scraping, data extraction from diverse sources, and integrating AI/ML models. Proven ability to increase efficiency and reduce manual efforts through automation and intelligent data pipelines.

WORK EXPERIENCE

- Software Developer At Rankkking****Oct 2025 - April 2026**
- Developed and maintained large-scale web scraping systems to extract data from PR agencies' press releases, including Web3/Crypto PR platforms, Web2/Crypto news outlets, and other media sources.
 - Built end-to-end data pipelines for ingesting, cleaning, and transforming scraped data from multiple sources, ensuring data quality and consistency.
 - Designed and implemented custom automation workflows using n8n as per client requirements, streamlining repetitive processes and improving operational efficiency.
 - Built and managed n8n workflow pipelines for automated data collection, transformation, and delivery across multiple client projects.
 - Leveraged AI-driven technologies for intelligent data extraction, content parsing, and automated classification of scraped content.
 - Managed and maintained in-house tools and data pipeline infrastructure, ensuring high availability and performance of data processing systems.
 - Created automated workflows for data collection, processing, and delivery tailored to individual client needs and specifications.

- Software Developer At Saksham System****2024 - Oct 2025**
(NPCI Client-side)
- Designed and executed SQL queries on the NPCI database to extract and validate campaign-specific data, ensuring 100% data accuracy.
 - Developed Python scripts to automate campaign data processing and reconciliation with Excel sheets, enhancing operational efficiency.
 - Reduced manual data validation efforts by 70% through automated comparison scripts between raw data and campaign Excel files.
 - Collaborated with cross-functional teams to interpret campaign logic and implement customized data solutions for real-time insights.

- Software Developer At Saksham System**
(Deloitte Client-side)
- Developed Django-based reconciliation modules to ingest Excel data, apply 11+ business rules, and eliminate duplicate transactions from past records.
 - Built OCR automation tools to extract and validate data from PDF invoices, enhancing accuracy and reducing manual effort.
 - Created interactive dashboards to visualize profit trends, repeat patterns, and duplicate data for streamlined auditing and reporting.
 - Automated Outlook email reporting with scheduled triggers, cutting manual communication by 95% and improving client response efficiency.

- Software Engineer - (Good Tenders)****2022 - 2023**
- Led IT team operations and task management.
 - Developed internal CRM and a data-finder GUI using Tkinter. Developed SSH-based GUI tools to simplify server access for non-technical users.
 - Automated product listings and bulk uploads, reducing manual effort by 80%.

ACHIEVEMENTS

- Built a Shopify-based e-commerce platform with dynamic product listings.
- Improved SEO strategy for product pages, boosting organic traffic.
